Reforma PREMIUM 8.0

Calidades y Confort

Creamos hogares únicos combinando materiales de alta calidad con diseños que marcan la diferencia.

De la mano de arquitectos e interioristas de primer nivel, hacemos realidad espacios pensados para transformar tu vida.

01

Carpintería exterior

Cada detalle ha sido pensado para ofrecer confort, eficiencia y durabilidad.

La **carpintería exterior** combina diseño funcional y tecnología de alto rendimiento para garantizar el aislamiento térmico y acústico que tu hogar necesita.

Contamos con **carpintería de PVC de cinco cámaras, con apertura batiente u oscilobatiente** según la tipología de cada estancia.

Doble acristalamiento con cámara y vidrios de baja emisividad, para mayor protección térmica y acústica, que optimizan el confort en el interior en cualquier época del año.

Las **persianas enrollables** incorporan lamas de aluminio con aislamiento térmico.

02

Carpintería Interior

La seguridad y la estética se encuentran en cada acceso de tu hogar. Cuidamos tanto la funcionalidad como la armonía del diseño interior para ofrecer espacios confortables, seguros y visualmente equilibrados.

Puertas de entrada blindadas que incorporan cerradura de seguridad para garantizar máxima protección.

En el interior **Puertas lisas** (acabado a elegir) complementadas con herrajes, manillas y tiradores en acabados inox, cromado o similar, que añaden un toque de modernidad y elegancia.

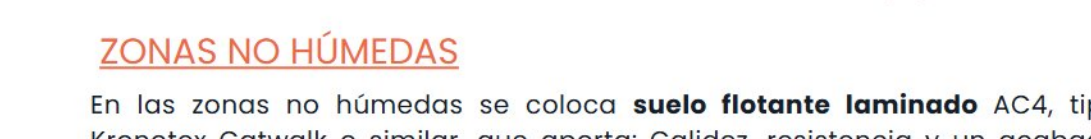

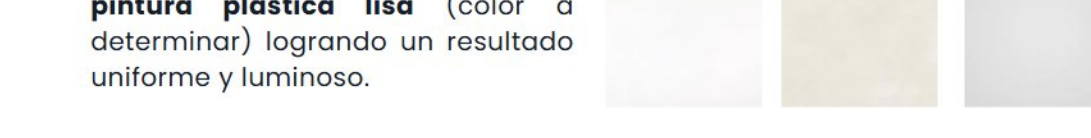

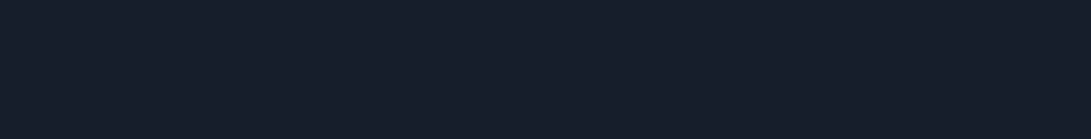

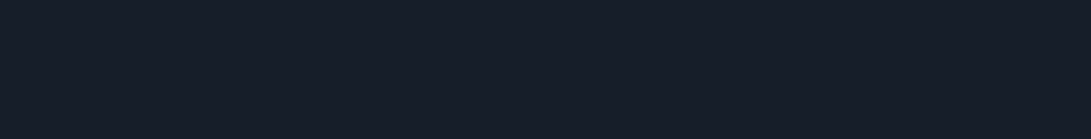

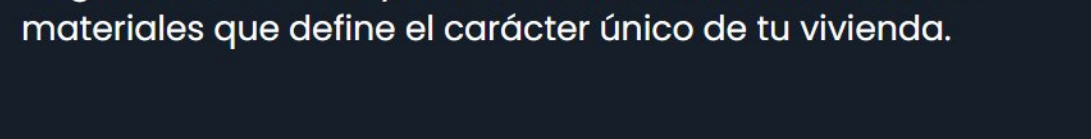

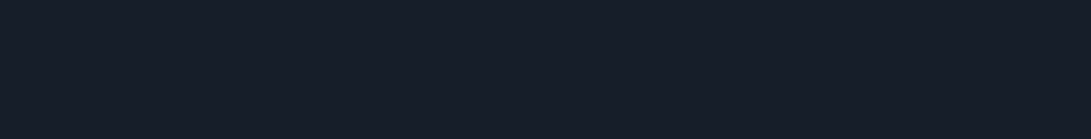

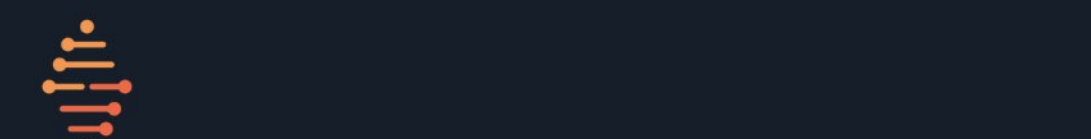

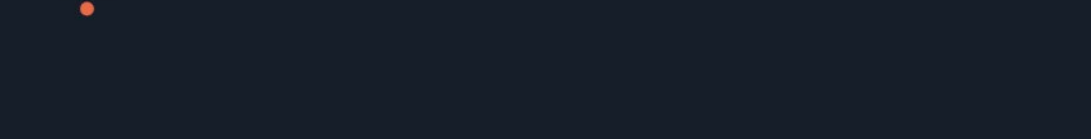

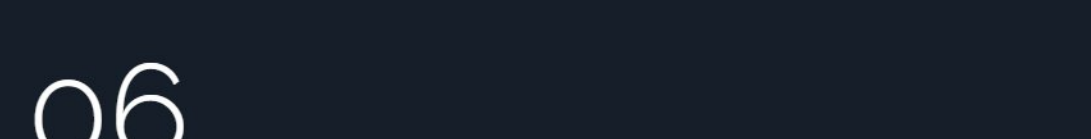

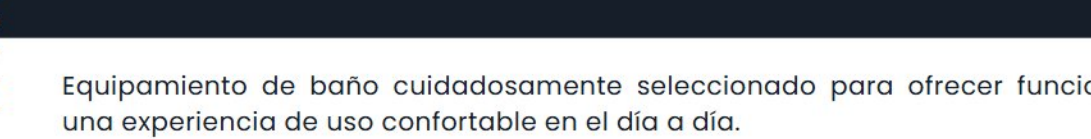

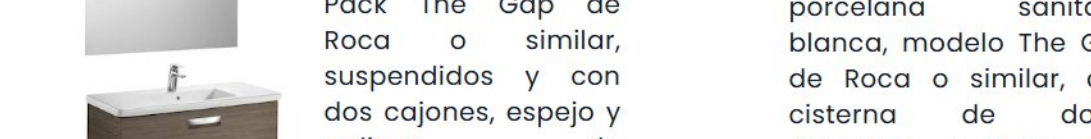

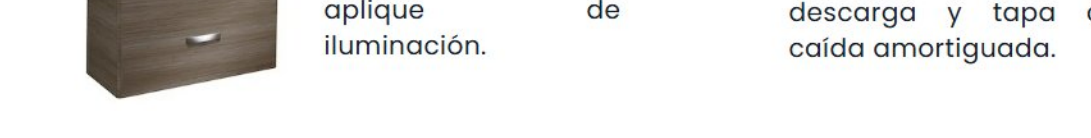

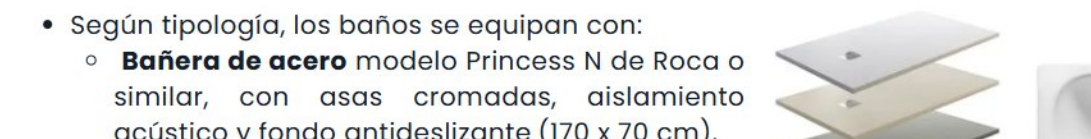

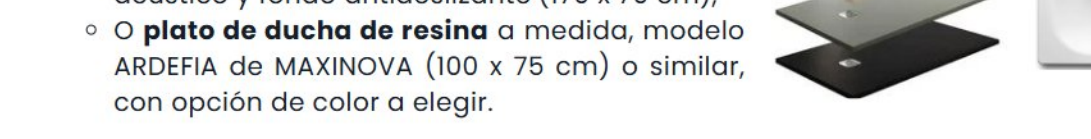

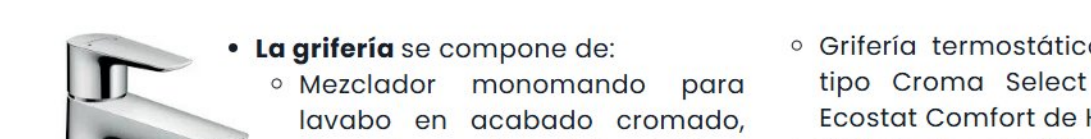

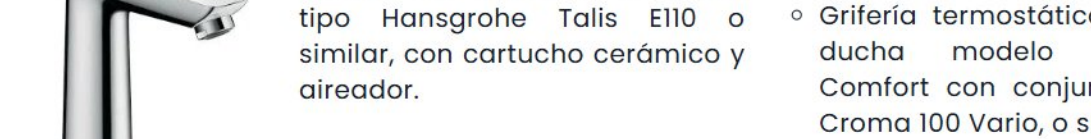

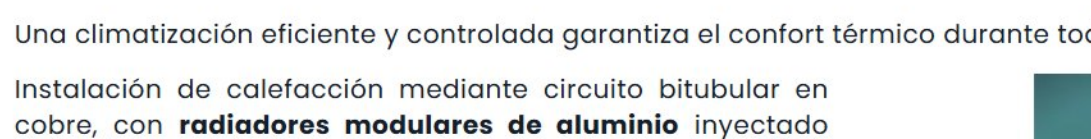

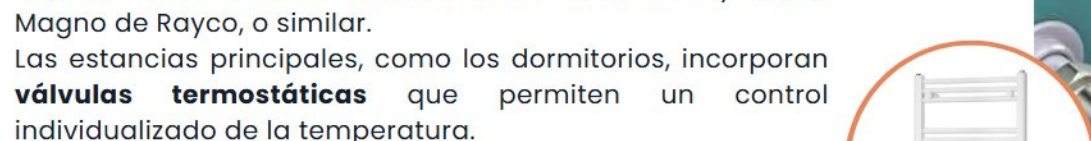

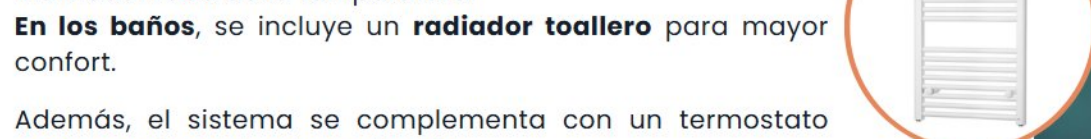

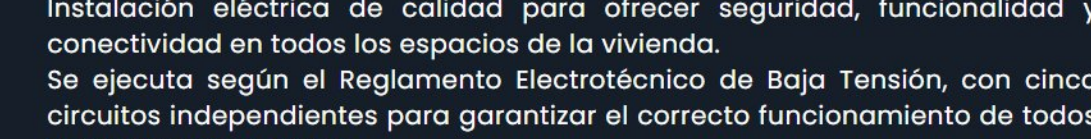

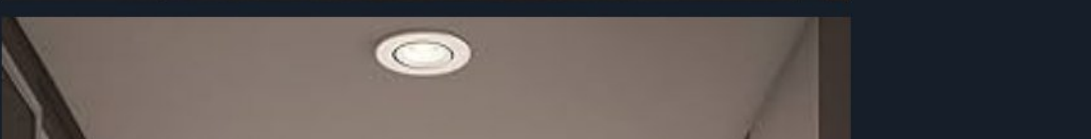

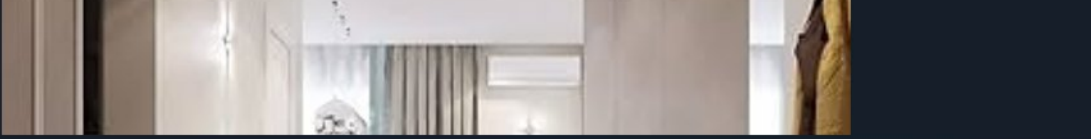

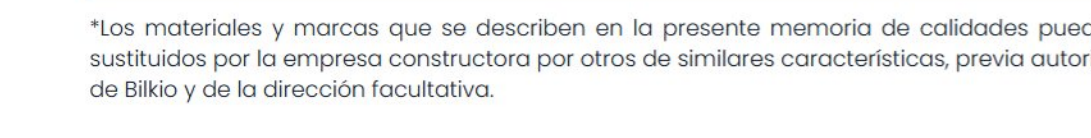

03

Tabiquería Interior

El confort interior comienza con una buena base. Las divisiones están pensadas para garantizar aislamiento, resistencia y una excelente calidad de acabado.

Los espacios se distribuyen mediante tabiquería compuesta por placa de yeso laminado en ambas caras, sobre perfiles metálicos, incorporando aislamiento interior de lana mineral para mejorar el confort térmico y acústico.

En baños y aseos, las divisiones se ejecutan con placa hidrófuga, especialmente preparada para recibir el alicatado y resistir la humedad con total fiabilidad.

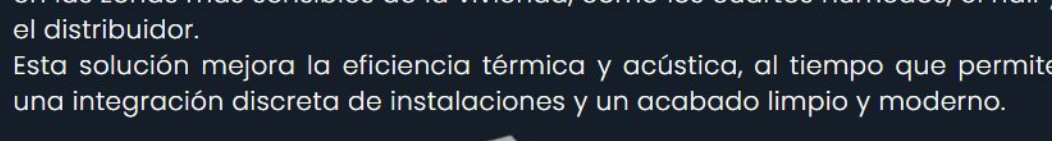

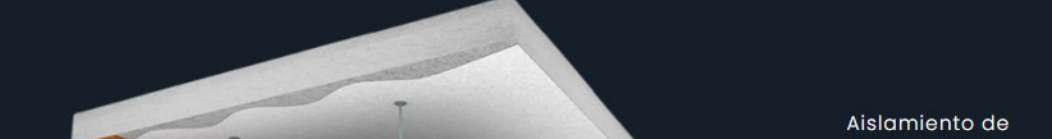

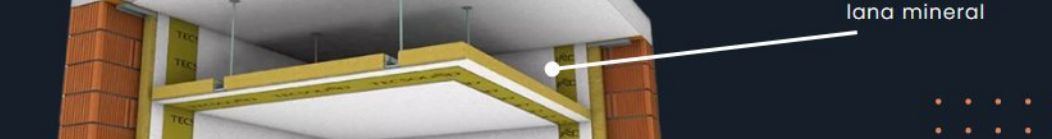

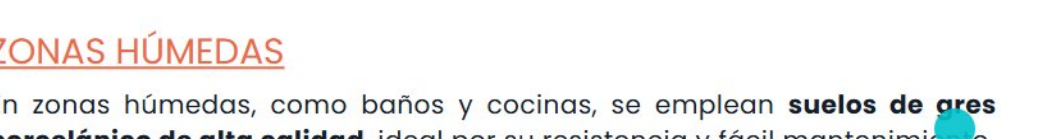

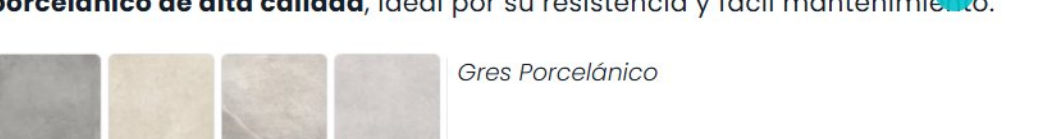

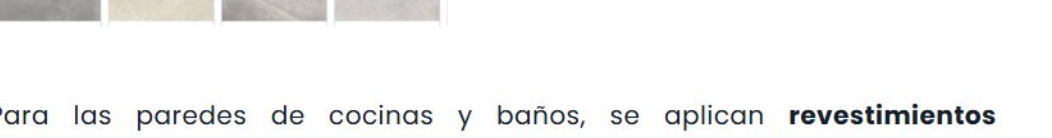

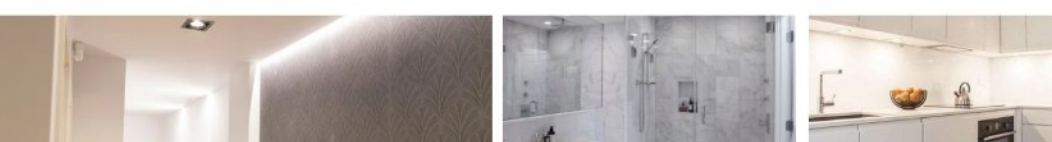

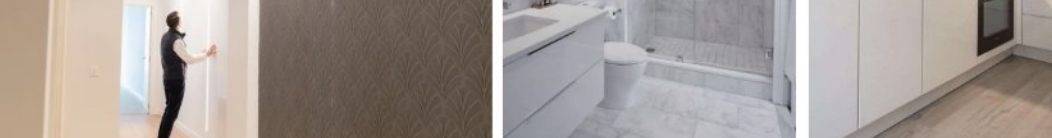

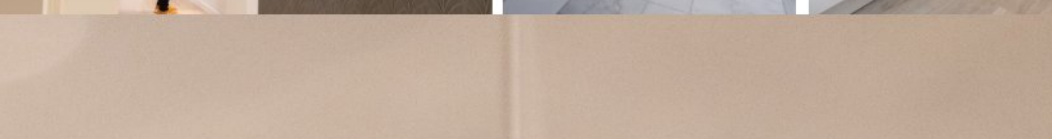

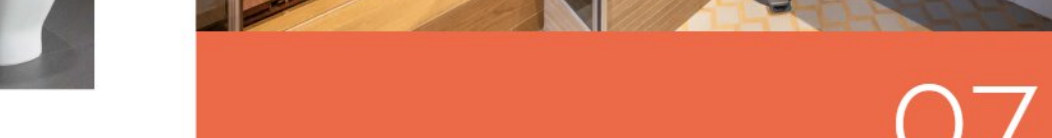

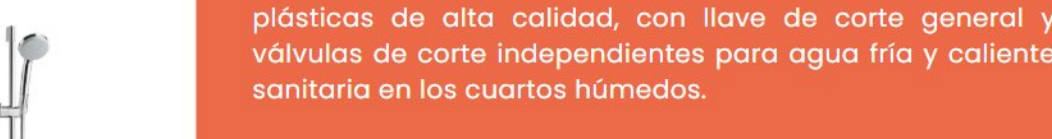

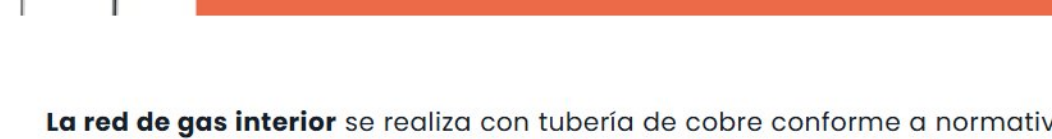

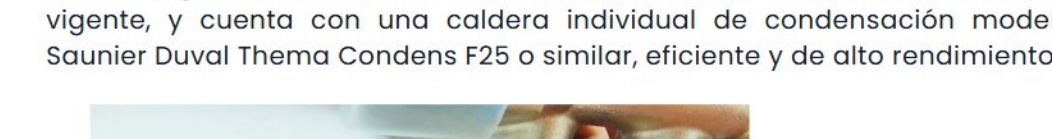

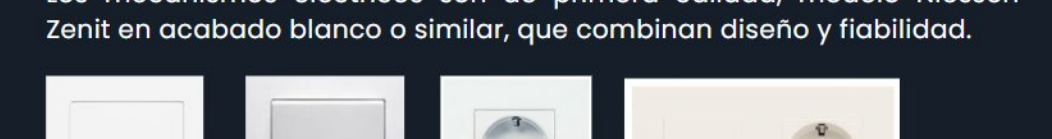

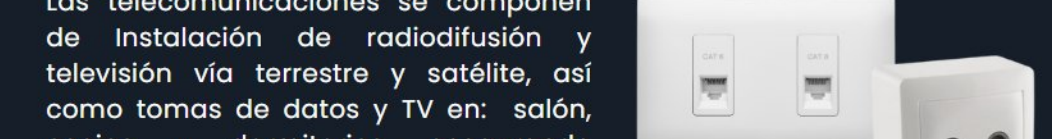

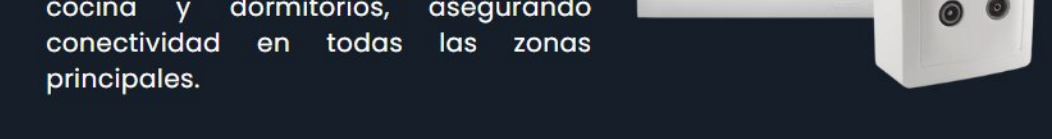

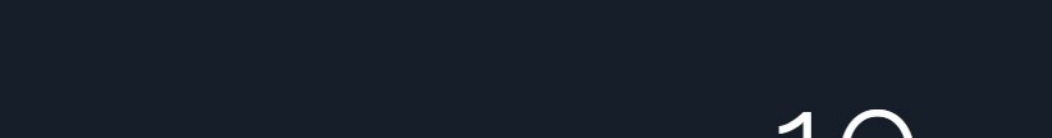

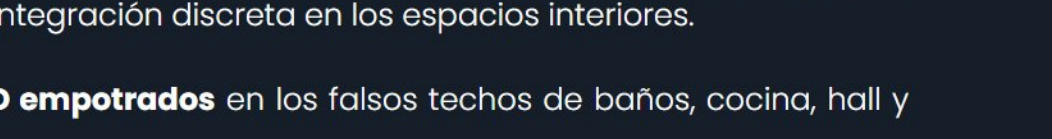

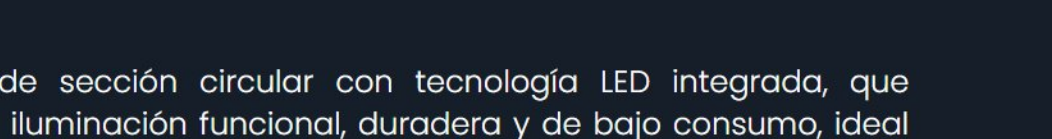

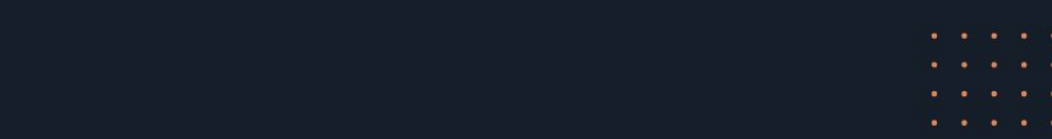

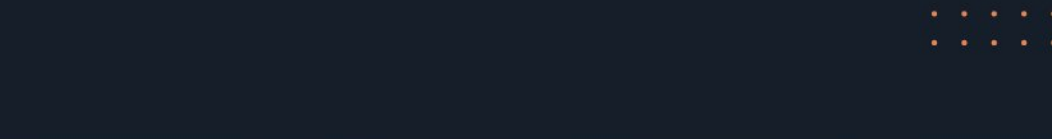

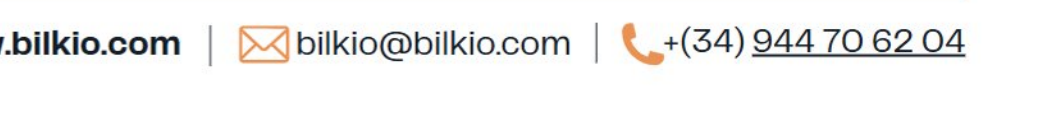

04

Acabados en Techos

Los falsos techos también contribuyen al aislamiento y a la estética de los espacios.

Se instalan **falsos techos de yeso laminado con aislamiento de lana mineral** en las zonas más sensibles de la vivienda, como los cuartos húmedos, el hall y el distribuidor.

Esta solución mejora la eficiencia térmica y acústica, al tiempo que permite una integración discreta de instalaciones y un acabado limpio y moderno.

Cada detalle cuenta

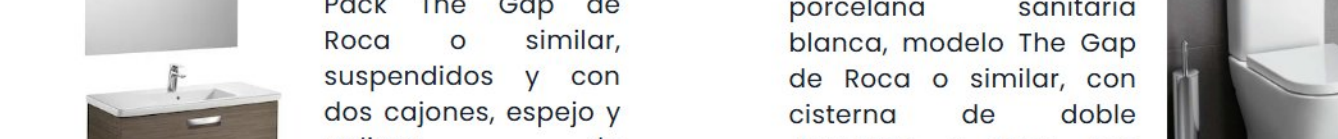

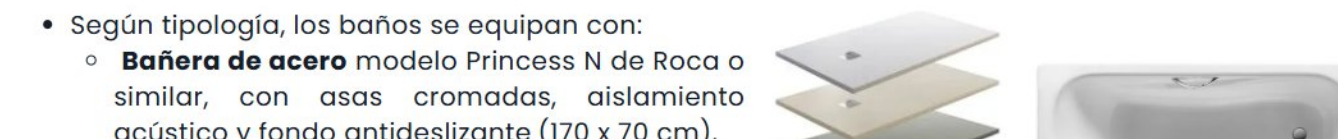

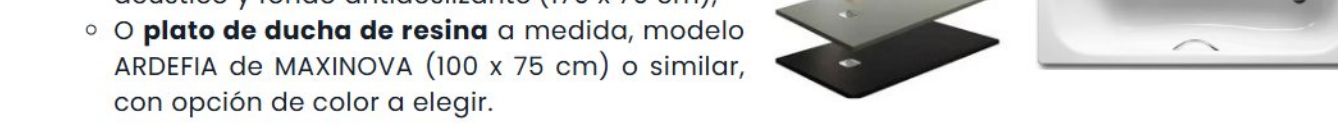

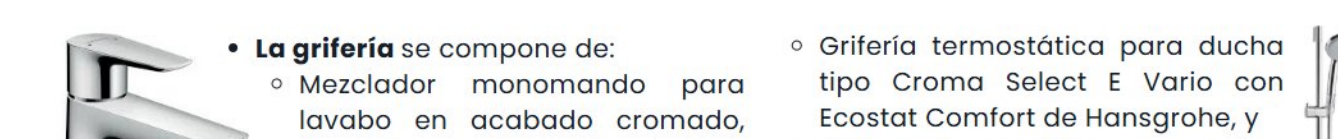

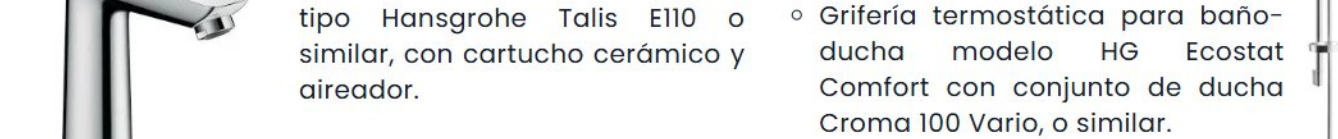

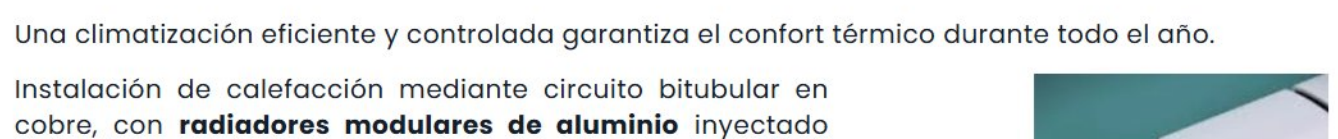

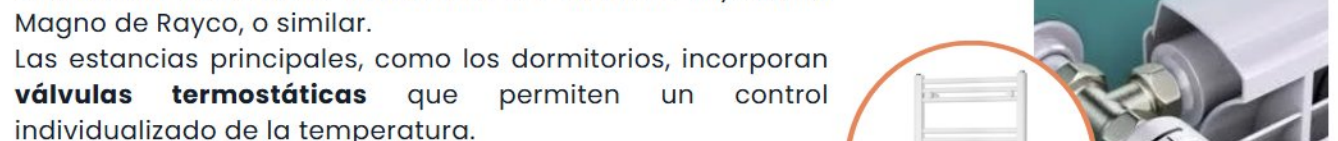

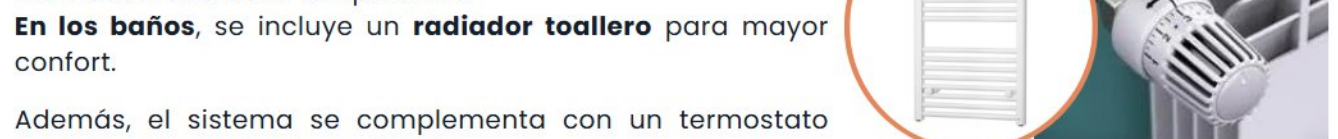

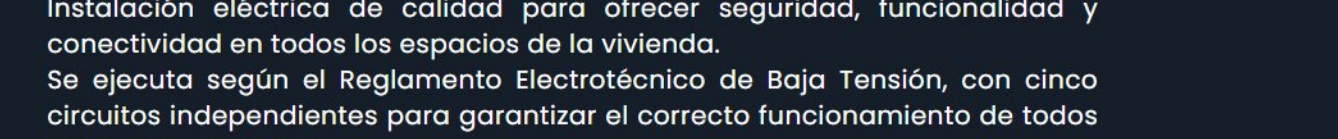

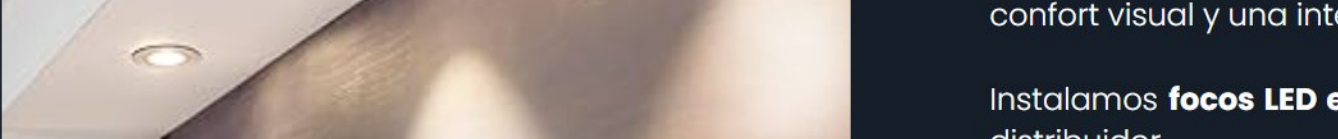

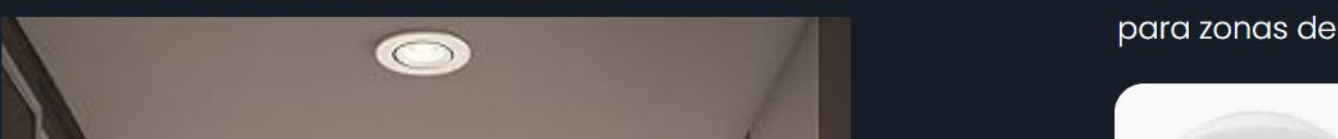

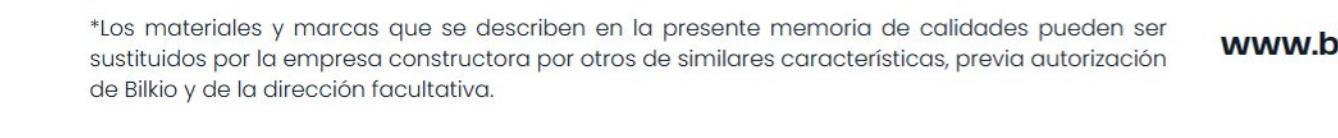

Elegancia, eficiencia y confort: una selección cuidada de materiales que define el carácter único de tu vivienda.

06

Sanitarios y grifería

Equipamiento de baño cuidadosamente seleccionado para ofrecer funcionalidad, diseño y una experiencia de uso confortable en el día a día.

07

Fontanería y saneamiento

La instalación de fontanería se realiza mediante tuberías plásticas de alta calidad, con llave de corte general y válvulas de corte independientes para agua fría y caliente sanitaria en los cuartos húmedos.

El sistema de saneamiento se ejecuta con tuberías de PVC, aisladas
